#### Final Action

## Response to Amendment

- 1. Applicant's arguments filed on March 5, 2004 regarding claims 1-2, 7-10, 15-16 have been considered. New claims 17-22 have also been considered and are currently pending.
- 2. Acknowledgement is made of amended specification received.

# Specification

3. The amendment filed on March 5, 2004 is objected to under 35 U.S.C. 132 because it introduces new matter into the disclosure. 35 U.S.C. 132 states that no amendment shall introduce new matter into the disclosure of the invention. The added material which is not supported by the original disclosure is as follows: "without changing said receiver sampling frequency."

Applicant is required to cancel the new matter in the reply to this Office Action.

# Claim Rejections - 35 USC § 112

The following is a quotation of the first paragraph of 35 U.S.C. 112:

The specification shall contain a written description of the invention, and of the manner and process of making and using it, in such full, clear, concise, and exact terms as to enable any person skilled in the art to which it pertains, or with which it is most nearly connected, to make and use the same and shall set forth the best mode contemplated by the inventor of carrying out his invention.

4. Claims 1-2, 7, 9-10, 15-16, 17-19, 20-22 are rejected under 35 U.S.C. 112, first paragraph, as failing to comply with the written description requirement. The claim(s) contains subject matter which was not described in the specification in such a way as to reasonably convey to one skilled in the relevant art that the inventor(s), at the time the application was filed, had possession of the claimed invention.

Regarding claim 1, the new subject matter recited in the amended claim is "without changing said receiver sampling frequency." The applicant does not explicitly disclose in the specification about this new subject matter in the claim limitation "estimating transmitted modulation signals by demodulating sub-carriers for a block of samples under consideration, wherein said estimation step comprising correcting the changes in position of the analysis window with respect to the said transmitted signal without changing said the receiver sampling frequency." In fact, the specification does not disclose the receiver sampling frequency would not change when estimating transmitted modulation signals on the receiver side.

## Allowable Subject Matter

5. Claims 3-6, 8, 11-14 are allowed.

### Response to Arguments

Applicant's arguments filed on March 5, 2004 have been fully considered but they 6. are not persuasive.

In response to applicant's argument that the references fail to show the limitation "estimating transmitted modulation signals by demodulating sub-carriers for a block of

the previous Office action.

samples under consideration, wherein said estimation step comprising correcting the changes in position of the analysis window with respect to the said transmitted signal without changing said receiver sampling frequency" as recited in claims 1, 9, 17, it is noted that these claims contain the new subject matter "without changing said receiver sampling frequency" that is not disclosed in the specification, which renders these claims being rejected under 35 U.S.C. 112, first paragraph as described above. In the event that applicant cancels the new matter from claims 1, 9, 17 to overcome the 35 U.S.C. 112,

### Conclusion

first paragraph rejection, claims 1, 9, 17 will be rejected in the same manner set forth in

7. Applicant's amendment necessitated the new ground(s) of rejection presented in this Office action. Accordingly, **THIS ACTION IS MADE FINAL**. See MPEP § 706.07(a). Applicant is reminded of the extension of time policy as set forth in 37 CFR 1.136(a).

A shortened statutory period for reply to this final action is set to expire THREE MONTHS from the mailing date of this action. In the event a first reply is filed within TWO MONTHS of the mailing date of this final action and the advisory action is not mailed until after the end of the THREE-MONTH shortened statutory period, then the shortened statutory period will expire on the date the advisory action is mailed, and any extension fee pursuant to 37 CFR 1.136(a) will be calculated from the mailing date of the advisory action. In no event, however, will the statutory period for reply expire later than SIX MONTHS from the date of this final action.
